

NOVOTEL CANBERRA

Sustainability Commitment

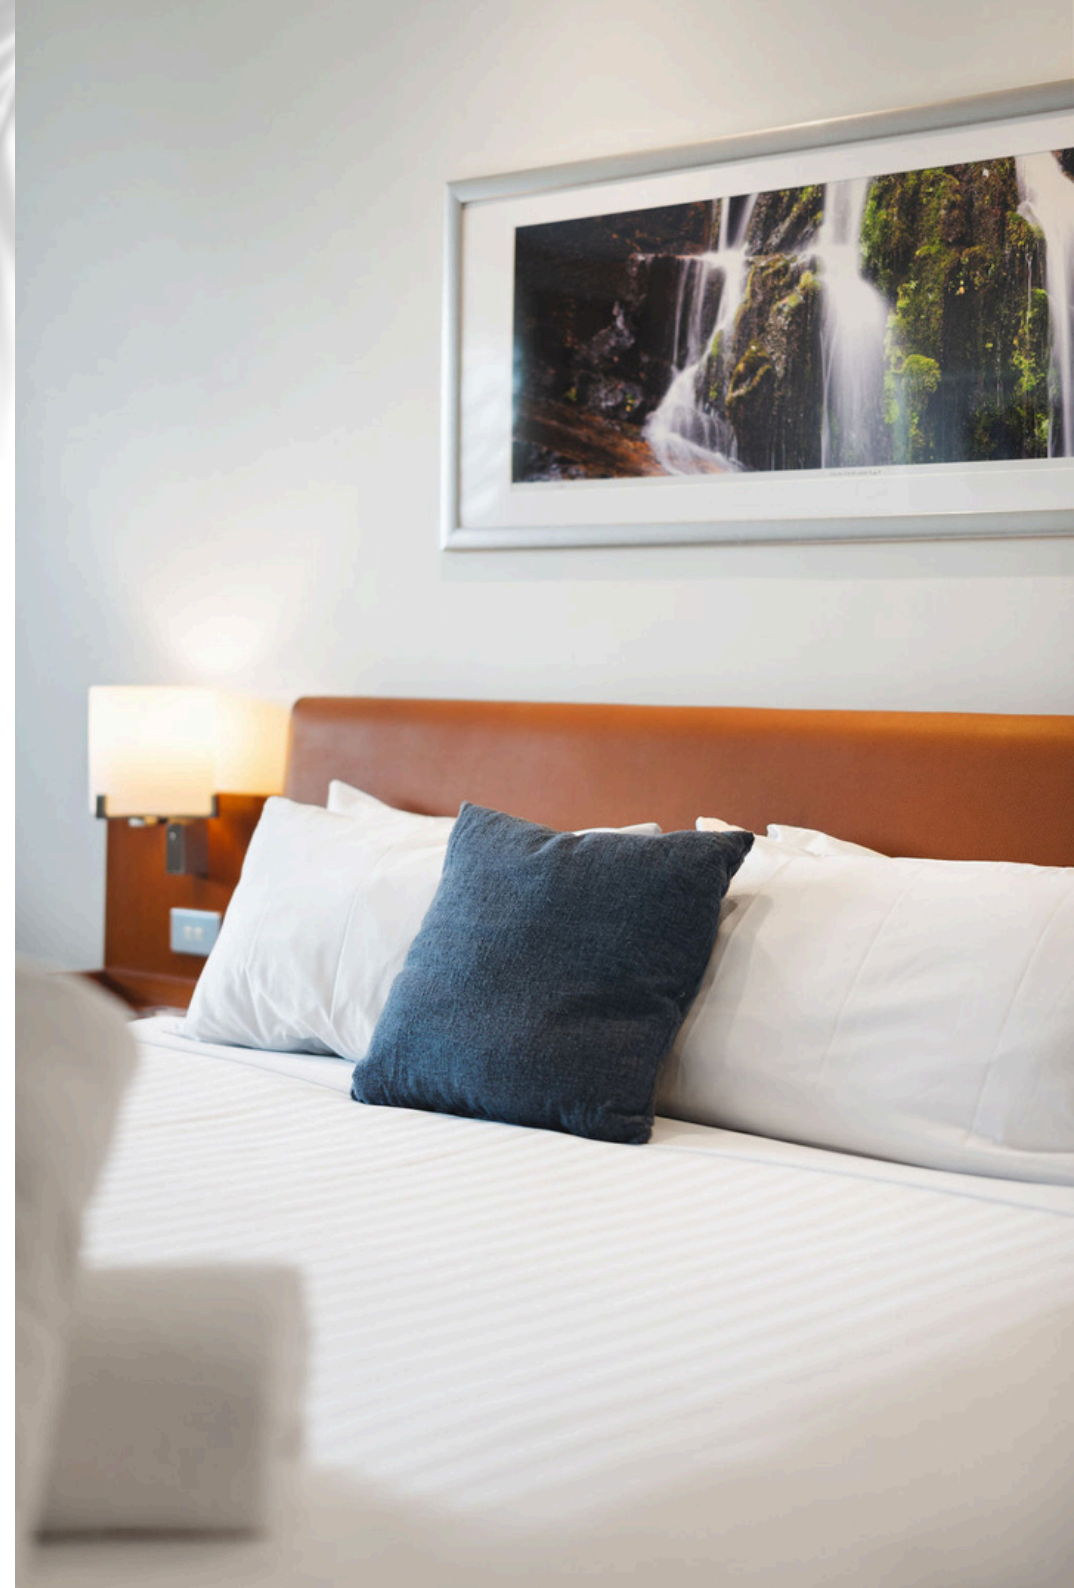

Sustainability Commitment

As Accor's trailblazers in the journey towards Net Zero 2050, we at Novotel Canberra make it our mission to tread lightly on earth. Our efforts, both front of house and backstage, are geared towards shaping a sustainable hospitality landscape.

In 2024, we've added a feather to our cap - the Ecotourism Australia Sustainable Tourism certification, along with a 3.5 Star Nabers rating. The first for any accommodation provider in the ACT, marking our commitment to the cause.

Our guests and corporate partners have the power to make a change with us. With our carbon calculator. They can measure and offset their stay's carbon footprint, making every visit a step towards a greener future.

Accreditation

A COMPLETE RESPONSE

Ensuring a comprehensive integration of sustainable practices across all hotel operations.

Hotel Sustainability Initiatives

ENVIRONMENTAL FOOTPRINT REDUCTION

Net zero carbon calculator
Linen free meetings & events
Go green initiatives
Energy and Water consumption reporting

Removal of all single use plastics
Sustainable in room guest amenities
Strategic procurement partners

PARTNERSHIPS & CERTIFICATION

Ecotourism Australia Sustainable Tourism certified
NABERS energy rating
WWF x Novotel partnership
Volunteer support for community initiatives

Ocean Protection Partnership with WWF

Novotel has entered into an international partnership with WWF (World Wide Fund for Nature). This collaboration aims to prioritise the protection and restoration of the ocean through science-based action and conservation projects. Novotel has always emphasised the importance of balance, and this partnership further demonstrates its commitment to maintaining the balance of our planet, particularly the ocean.

Novotel's Positive Impact Plan

The plan, which will span three years, will be based on the United Nations' priority ocean-related actions and focus on reducing marine pollution and ocean acidification, combating overfishing, and increasing scientific knowledge about ocean health.

This plan will encompass initiatives across four key pillars

REDUCE PLASTIC, WATER & CARBON FOOTPRINT IMPACT

MAKE SUSTAINABLE FOOD CHOICES

ENHANCE EDUCATION & OCEAN AWARENESS

CONTRIBUTE TO RESEARCH & INNOVATION

Making a Positive Impact

The partnership with WWF will help Novotel drive operational change and action for the greater good of the ocean and deliver upon its Positive Impact Plan.

With a specific focus on the ocean, the WWF partnership has four main objectives:

Work on sustainable seafood policies and supply chains for Novotel hotels and restaurants

Raise guests' and employees' awareness of the importance of the world's oceans

Advocate for ocean preservation to inspire industry and policymakers

Preserve and restore marine biodiversity through support of five WWF flagship projects around the world
